### Differentiation Statement

Chronograph provides portfolio monitoring, reporting and diligence tools for private capital investors. Limited Partners can unify data from fund commitments, secondaries, co-investments, directs and more to turn scattered PDFs, Excel files, databases and other sources into a complete view of private capital information across buyout, venture, growth, real estate, infrastructure, natural resources, credit and every other sub-asset class.

### Product Customization Options

Spend time on what matters - meeting managers, interpreting analyses and developing a thoughtful view. Chronograph LP provides unrivaled insights on underlying portfolio company and asset performance. No clunky templates, no self-reported data, no burdens on GPs, no new work. The platform's intuitive interface provides access to all underlying fund and portfolio company data, cash flows, capital account balances, fees, carried interest, fund terms, valuation metrics, leverage measures, partnership financials and every other data point about your portfolio. Chronograph integrates with the Microsoft Office suite and existing systems to provide investment, reporting and financial professionals a consolidated means of aggregating, consuming and protecting investment data.

### Product Cost Structure

### Product Implementation - Typical Timeline and Support Structure

Vendor did not provide this information.

### Integration and API Functionality

The days of walled gardens are over - easily integrate existing architecture and workflows. Chronograph serves as a private capital 'macro service' with interconnectivity at its core. From modern standards to middleware architecture, the Chronograph API is designed for developer ease-of-use and interoperability. Third-party APIs: Access data at scale with our OpenAPI and GraphQL architecture. Chronograph makes it easy to get data out. Robust Middleware: Connect existing systems and vendors with seamless middleware. Integrate accounting solutions, custodian feeds and more. Self-Service Documentation: Developers can request a key and start building immediately with helpful tools like a dynamic schema knowledgebase that's always up to date.

## Managed Data Services Overview

Painless at onboarding, and every quarter thereafter. Chronograph is designed to require as few internal resources as possible. No operational or reporting changes, no software integrations and no burden on your GP relationships. Our team will work with you to provide a process that best suits your needs and scales to solve for all complexities of capturing performance data.

## Client Overview

### Client Support Approach and Availability

The efficiency of our Client Services teams reflect our heritage as buy-side investment professionals. We ensure all clients have access to scalable resources that can meet any technical or servicing demand. We believe we are highly differentiated in the responsiveness and thoroughness of our organization and would encourage diligence of this point in detail in reference conversations.
