Differentiation Statement

Lenox Park Solutions is a FinTech company servicing the Asset Management Industry that leverages significant domain expertise in its creation and maintenance of proprietary technology solutions that enable collaboration, data aggregation and analysis, and insights generation around investment managers and deals. Our flagship technology platform, RoundTables, is a cloud-based ecosystem for Asset Managers that provides access to two primary tools and business lines via a subscription-based model: i) Data Aggregation and Analysis, which includes RoundTables Surveys, and the Lenox Park Diversity Impact Score (LPI) DEI index, as well as other data driven assessment tools; and ii) Collaborative and Networking Technologies, such as our RoundTables Peer Organized Domains (PODs) that function as private-peer networks around a theme, allowing for collaboration around Investments, Events, and other contributions. Specific applications include collaboration around manager selection, co-investment syndication, secondaries, and investment strategies. Lenox Park's mission is to enable democratization of access to capital for all participants in asset management through the promotion of transparency and use of technology to eliminate bias, and to promote meritocracy.
