Market Data	N		

Differentiation Statement

MJ Hudson is an asset management consultancy, listed on the Alternative Investment Market of the London Stock Exchange. Our key technology solutions for LPs are: (1) Private equity performance analytics - an alternative to IRR that measures manager skill; (2) ESG and sustainability monitoring and reporting - a full suite of services to ensure the quality and reliability of ESG portfolio activity and reporting; (3) Custodian bank benchmarking - analysis of services provided to asset owners by custodian banks, according to service level and cost. Specializing in alternative assets, we work with investors into private equity and other alternative asset classes, but also work with fund managers and advisers, presenting us with perspectives that others may lack. By leveraging our investments in data, technology, and analytics, our team of 220 professionals in our London HQ and Europe & North America offices works for many of the world's most significant investors and managers. We started as a law firm, but alongside a suite of legal services that we continue to provide to LPs, we now also include in our offering fund performance analytics, operational investment and legal due diligence, ESG & sustainability, investment consulting, research, analytics, investor relations and reporting.
