Market Data	Y		

Differentiation Statement

eVestment Private Markets, a Nasdaq company, enables institutional investors to streamline and scale their private fund due diligence processes with our purpose-built research and performance analytics platform, TopQ+, which integrates fund and market data, benchmarks and powerful deal-level analytics in one place, to enable limited partners to easily access and analyze previously disparate information sources. With this, LPs can gain a more complete view of manager performance, unlock a new level of insights on the drivers of returns and streamline and standardize processes to bring greater confidence to their fund investing decisions. When combined with Solovis, eVestment's multi-asset class portfolio management solution, we offer LPs a powerful decision-support platform for researching investment opportunities and evolving multi-asset class portfolios across both public and private assets - delivering the efficiency, agility and insights needed for better investment decisions.

Product Customization Options

TopQ+ is a SaaS-based tool with all functionality available upon access being granted to users. While "off-the-shelf," users can configure the wealth of analytics capabilities to suite their specific needs. Examples include: create custom dashboards of analytics to show only the performance metrics and insights you care about; choose from all leading public market equivalent calculation methodologies, and a wide selection of indices, to benchmark performance against.

Product Cost Structure

Pricing is based on a number of factors and client requirements. Please get in touch to find out more about pricing for your specific needs.

Product Implementation - Typical Timeline and Support Structure

As a SaaS-based product, no installation is required for TopQ+ and clients can be up and running on the same day. All clients receive full on-boarding training and support to reduce their time to value.

Integration and API Functionality

Through partnerships with Preqin and PitchBook, users are able to access these providers' benchmark data within the performance analytics platform to perform peer comparison and quartile analysis.

Managed Data Services Overview

Our experienced client success team helps you spend even less time uploading and capturing GP data, and instantly expanding your team's capacity.

Client Overview

Client Support Approach and Availability

All clients will have access to a regional private markets Client Success Manager, available Monday to Friday for all support and help requests.

Client Training

All clients are offered full onboarding support to maximize their subscription from day one. Product training materials are available in a dedicated Learning Library, accessed on-demand. Bespoke training sessions can be arranged with your client success manager.
