

# The Fundamentals of Private Equity

## ● INTRODUCTORY COURSE

The Fundamentals of Private Equity course is designed for the private markets professional looking to understand the basics of the private equity asset class and its essential terms, strategies and challenges.

This self-paced, online program combines self-guided learning with interactive videos and quizzes designed uniquely by the ILPA Institute executive education team.

## Key Learning Objectives

---

- Learn key terms and definitions that are commonly used when talking about private equity
- Understand the role of private equity as an asset in an investment portfolio and how it is structured
- Review the different roles within private equity and how they impact the investment process
- Understand the key characteristics of investing in private equity, including the benefits and challenges
- Explore the main types of private equity investment strategies and be able to differentiate between them
- Learn about the role regulatory bodies have in protecting investors and ensuring market integrity

## Who Should Attend?

---

This program is part of the ILPA Institute's Introductory series of courses, which means this program is designed for anyone new to private markets or interested in learning about the asset class.
